

Attendance

Know **within hours** if a child is absent from school

School attendance can be a key indication of changes to a child's situation. Alerting you to unauthorised absences as they occur, including morning and afternoon, Capita One allows your teams to take action at the earliest opportunity.

By providing a complete picture of attendance by pupil, groups of pupils, single schools, clusters or authority-wide, you can identify persistent truancy and problem areas so that targeted support can be given where it is needed most.

Complex data is turned into quick and accessible pre-defined reports identifying patterns in pupils' non-attendance, monitoring the effectiveness and impact of anti-truancy initiatives and other interventions.

Comparisons between schools can also be monitored, allowing best practice to be easily shared.

Key Benefits

- **Share information:** automatic uploads can provide 'real-time' data by linking with school's management information systems, allowing data to be shared with across multi-agency teams.
- **Improve outcomes:** spend less time on administration and more time with the child by having all the right information available at the right time.
- **Monitor impact:** easily monitor the impact of anti-truancy initiatives and other early intervention strategies.
