

Bases

Accurate information on establishments throughout your authority

By maintaining core information about all sites, a range of authority-wide processes, services and support can be made for efficient across Children's Services. Bases provides local authority staff with the most accurate information on the establishments in their area, such as schools, pupil referral units and other establishments. The information held can be easily access remotely from any internet-enabled device.

Providing a single, accurate source of information that will be used by multiple staff on multiple tasks, Bases eliminates the need for multiple databases or records. Information stored could include core data, such as addresses, opening times or contact details for key holders or additional information such as intake numbers, term dates, names of headteachers and LA support officers. Administration efficiencies can also be achieved by mapping categories required by the DfE for statutory returns and reports.

Bases supports various Capita One products including admissions, training, governors, personnel or transport providing a single, accurate source of information that can be used by multiple staff on multiple tasks.

Key Benefits

- **Share information:** authority-wide core information on schools, pupil referral units and other establishments eliminates the need for multiple staff in multiple teams to maintain their own database(s) of information.
- **Extend teamwork:** field-based practitioners can quickly access information from any internet-enabled PC or device with a secure log in and password.
- **Target intervention:** staff across the authority can rely on information with confidence to identify children and families at risk by providing a comprehensive, holistic view of core data.
- **Reduce costs:** increases efficiency and productivity by eliminating the need for multiple databases.
