

Education Plan Monitoring

Build an **individual profile** of your schools

Building an individual picture of each school allows you to monitor effective practice and determine areas for development, allowing you to allocate support and resources where they are most needed.

Capita One simplifies the recording and monitoring of progress against the Children and Young People's Plan and reduces the administration required to make appointments with schools and follow-up actions post visit.

It records strength as well as areas for development within schools to facilitate more targeted allocation of resources, while aiding the development, implementation and monitoring of programmes of best practice and new initiatives across the authority.

Key Benefits

- **Share information:** build a knowledge base of best practice by sharing across the authority.
- **Extend teamwork:** allocate support time to schools directly from practitioners' diaries by using one system.
- **Target intervention:** monitor the impact of targeted support and quickly create detailed action plans for schools, groups and individuals.
- **Reduce Administration:** practitioners' can effectively manage their workloads to ensure they maximise their time in providing support to schools.
- **Reduce costs:** easily manage the support and services being provided to schools and monitor their impact, effectiveness and value for money.
