

Family Information Directory (FID)

Provide **greater information** to your community

The Family Information Directory (FID) provides a single comprehensive directory of childcare information, facilities and publications readily available to the local community.

The software provides parents, carers, prospective parents and other interested members of the public with convenient, easy to use information on local childcare provision. The portal provides an interactive tool that highlights the location of provision and services in proximity to the enquirer's place of work or home and provides a more efficient enquiry process enabling real-time responses to be provided.

Information on every provider can be shared with two separate locally defined Family Information Directories, reducing the need to maintain a series of separate information systems whilst meeting your Section 12 Childcare Act (2006) obligations.

Key Benefits

- **Share information:** an interactive system for the public to access information about the range of childcare services provided locally.
- **Target intervention:** identify children who are not currently registered for any childcare provision.
- **Reduce costs:** target resources where they are needed most by reducing the need to maintain a series of separate information systems.
