

PULSE

Monitor pupil attainment and **support** school improvement

Providing access to a comprehensive view of a student record, including a pupil's attainment, ensures more effective target-setting to raise student achievement.

Capita One provides a powerful comparison of performance against a range of target indicators including FFT estimates and RAISEonline data. Enabling a quick and easy production of simple statistical tables and graphs to analyse school performance communication and data sharing between schools is improved.

Student assessment data can be analysed by individual, cohort, school, school cluster or authority-wide allowing for early trends to be identified and interventions to be targeted accordingly.

Key Benefits

- **Share information:** set learning targets that are both realistic and appropriately challenging by analysing past performance and share best practise across the authority.
- **Extend teamwork:** data is easily and securely transferred to the authority directly from SIMS or other school information management systems.
- **Target intervention:** identify earlier those who need additional support by accessing complete and accurate historical records.
- **Improve outcomes:** providing true intelligence to allow you to affect the outcomes of young people by through secure and efficient data sharing.
