One Transport

Make it easier
to manage
your transport
responsibilities

Transforming lives together

Make it easier to manage transport services

Whether you're a unitary authority or a county council, our suite of transport solutions can support you in delivering your transport responsibilities effectively.

The One Transport solutions are designed to help teams streamline the administration of transport arrangements, including vehicle bookings, by drawing on the data already held in One and providing quick, easy access to information on children, schools, establishments, drivers and escorts.

Parents and carers can apply online for transport services via the self-service portal, with this information then immediately accessible to teams. Once applications have been approved these can then be processed as a batch with all communications sent via the portal, saving further time for authority staff.

To further help you make the most of your resources, whether in relation to staff or vehicles, the One route optimisation tools allow you to plan more efficient, shorter journey times and deliver better value for money.

How One helps...

Streamline administration

All the information you need for home-to-school transport in one place, including bulk statutory eligibility checks and the generation of vehicle payments

Safe and secure

Training details, drivers' contracts and Disclosure and Barring Service (DBS) checks can be added to help with assigning suitable drivers and escorts to specific routes or children

No need to re-enter data

The office application and the portal are designed to work together so data entered by parents and carers is entered directly in your system

Deliver the best value for money

Effectively manage and plan the the most optimum routes to maximise staff resources and the use of vehicles

Flexible to adjust to local needs

Discretionary entitlements can be added to fill any spare capacity on vehicles

One Transport – SEN & Adults Social Care

You can use One Transport to support you with allocating and providing specialist transport services to ensure children with special educational needs can travel to school safely and comfortably, in a way which meets their individual requirements. One can also support you with the allocation of specialist transport arrangements for adults who are being cared for by your adult social care services.

Boost your transport service delivery with the power of GIS

You can make even better use of the resources and vehicles available to your authority with our powerful route optimisation tools for a holistic approach to home-to-school transport planning.

One GIS route planning ensures you're choosing the most efficient, shortest journey times, and helps you reduce congestion by making use of all the school gates available.

This allows you to maximise the use of your vehicles, ensuring that you're delivering the best value option possible, as well as helping ensure that students aren't travelling for longer than they need be.

With quick calculation of home-to-school distances via roads and footpaths, teams can link pupil address information in One with this visually represented on maps. Colour coding allows staff to see at a glance whether a school transport route has extra capacity.

One Route and Vehicle Allocation

Optimise routes to school and available vehicles for students with a statutory entitlement to home-to-school transport. One Route and Vehicle Allocation (RAVA) shares common data with One Transport, including preferred route scenarios, geo-coded stops and passengers, allowing for bulk updates and freeing your transport team to focus on contract and tender management, the provision of tickets and passes and other ongoing transport processes.

One SEN Vehicle Management

Complementing One Transport SEN is One SEN Vehicle Management which supports local authorities in maximising the use of vehicles and routes to school for students with special transport needs. Using data from One Transport, SEN Vehicle Management makes it easy to manage complex transport arrangements and costs, allowing transport teams to spend less time planning and administering contracts and more time monitoring their quality.

For further information on how One supports local authorities with the delivery of education services, including school admissions, please contact the One team at info@capita-one.co.uk
